SUMMARY

I'm a backend developer specializing in creating scalable web applications. My expertise includes Node.js, GraphQL, and MongoDB, but I am highly adaptable and open to learning new technologies. I excel in both independent and team settings, valuing collaboration and staying current with industry trends. My commitment to continuous learning ensures that I am always ready to embrace new challenges and technologies.

EXPERIENCE

Backend Developer
Kuitansiku.id (January 2024 - February 2024, Yogyakarta, Indonesia)
- Project Initiation for CRUD Operations: Spearheaded the development and implementation of a project that established robust Create, Read, Update, and Delete (CRUD) functionalities.
- Database Modeling: Engineered comprehensive database models to optimize data storage, retrieval, and overall efficiency.
- Bug Fixing for API Services: Diagnosed and resolved critical bugs in API services, significantly improving system stability and performance.
- Data Import Scripts: Crafted efficient scripts for importing data from CSV files into the database, ensuring accuracy and consistency.

Backend Developer
Zettabyte Pte. Ltd (December 2022 - December 2023, Yogyakarta, Indonesia)
- Design and Development: Proficient in designing, developing, and optimizing scalable and robust backend solutions.
- Feature and Research: Lead feature development and conducted in-depth research to implement innovative and effective solutions.
- Code Quality and Bug Resolution: Maintain high-quality, readable, and maintainable code, and promptly resolve bugs and data issues to ensure system stability and performance.
- Cross-Team Collaboration and Mentoring: Foster collaboration with other teams for seamless integration and functionality, and provide mentoring on introductory materials for Bootcamp Batch 4.
- Task Management: Implement efficient task management strategies to ensure on-time and successful project completion.

EDUCATION

- **Zettacamp Batch#3 - Backend Developer**
  Zettabyte Pte. Ltd · Yogyakarta, Indonesia · 2022
- **Vocational High School - Computer Engineering and Networking**
  SMKN 1 Bawang · Banjarnegara · 2017

CERTIFICATIONS

- **Software Engineering Fundamental**
  RevoU · 2024 · Completed 2 weeks course from RevoU.
- **Completing Zettacamp Batch #3**
  Zettabyte Pte. Ltd · 2022 · Graduated and completed the final project from the Intensive Bootcamp, Batch #3 at Zettabyte Pte. Ltd.

COURSE

Software Engineer Fundamental
RevoU · HTML, CSS, Javascript, Web Engineer, Software Engineer

SKILLS

- **Hard Skill**: Node.js, Express.js, Mongo DB, Authroization and Authentication, Apollo GraphQL, Git, Github, HTML/CSS/JS, Web Services API, Feature Development, Swagger UI, React.js and Jest Unit Testing.
- **Soft Skill**: Teamwork, Task Managements, Provlem Solving, Communication, Eagerness to learn and Discipline.
