SUMMARY

I build scalable, high-performance systems with a focus on extreme optimization. My highlight: refactoring database queries to slash execution time from **5 minutes to 5 seconds** (a 98% performance boost). Currently engineering robust backend solutions at **Badan Sistem Informasi UII**. I thrive on solving complex architectural puzzles and ensuring data integrity across distributed systems.

EXPERIENCE

Badan Sistem Informasi - Universitas Islam Indonesia 09/2025 – Present
Backend Engineer Yogyakarta, Indonesia

- Design, develop, and maintain backend services using **PHP (Lumen) and Go**.
- Develop and maintain **RESTful APIs** for internal and integrated systems.
- Design and optimize **MySQL database schemas and queries** to improve application performance.
- Integrate backend systems with **third-party services and external APIs**.
- Monitor and maintain **system availability, reliability, and security**.
- Collaborate with **frontend developers** to integrate APIs with user interfaces.
- Troubleshoot, debug, and resolve **production issues and system bugs**.
- Optimize application and database performance to ensure **efficient system operations**.
- Participate in **technical discussions and requirement clarification** with stakeholders and development teams.

Zettabyte Pte. Ltd 12/2022 – 12/2023
Backend Developer Yogyakarta, Indonesia

- Designed and developed **backend features and services** to support application functionality.
- Conducted **technical research and prototyping** to support feature development and system improvements.
- Maintained **clean and maintainable code**, and resolved bugs to ensure system stability.
- Collaborated with cross-functional teams to ensure **smooth system integration and feature delivery**.
- Assisted in mentoring **Bootcamp Batch 4 participants**, providing guidance on introductory development materials.
- Managed development tasks to ensure **timely project delivery**.

FREELANCE EXPERIENCE

Tembus.in 12/2025 – 03/2025
Freelance Backend Engineer Yogyakarta, Indonesia

- Developed backend services using **Golang and MySQL** for an **online tryout platform**.
- Designed and implemented **database schemas** to support core system functionality.
- Built multiple system modules including **question asset management, practice exercises, tryout system, user management, product catalog, purchase transactions, question reporting, and discussion forums**.
- Integrated **object storage services (AWS-compatible storage via Biznet)** for managing question assets and system files.
- Collaborated with **web and mobile frontend teams** to ensure smooth API integration and system functionality.
- Coordinated with other backend developers to **distribute tasks and maintain development workflow**.

ALIF Montessori School - Islamic Montessori 03/2024 – 05/2024
Freelance Fullstack Developer Yogyakarta, Indonesia

- Rebuilt and enhanced multiple system modules including **student management, teacher management, broadcast, curriculum, activities, admissions, and report systems** based on updated requirements.
- Implemented a **manual payment system** to support administrative financial tracking.
- Refactored legacy code and optimized **database queries** to improve system performance and maintainability.
- Developed and maintained both **backend and frontend components using MVC architecture**

Kuitansiku.id 01//2024 – 02/2024
Freelance Backend Developer Yogyakarta, Indonesia

- Developed backend modules implementing **CRUD operations using Node.js and REST APIs**.
- Designed and implemented **database schemas (MySQL / MongoDB)** for efficient data storage and retrieval.
- Diagnosed and resolved **API-related bugs**, improving system reliability.
- Built **automated scripts to import CSV data into the database**, ensuring accurate data migration.

EDUCATION

Zettabyte Pte. Ltd - Zettacamp Batch#3 (Bootcamp) 09/2022 – 12/2022
Backend Developer Yogyakarta, Indonesia

- Gained comprehensive knowledge and hands-on experience in programming and development.
- Mastered the use of Node.js, Express.js, GraphQL, JWT Web Tokens, and MongoDB.
- Developed robust, scalable, and user-friendly backend solutions through intensive projects and assignments.
- Emphasized the importance of maintaining high-quality code standards.
- Enhanced teamwork and communication skills through collaborative projects.
- Implemented efficient task management strategies to ensure timely project delivery.

SMKN 1 Bawang Banjarnegara - Vocational High School 2017 – 2019
Computer Engineering and Networking (TKJ) Banjarnegara, Indonesia

- Focused on computer networking fundamentals, system administration, and basic programming

SKILLS

Engineering & Development
- RESTful API Development
- Microservice Architecture
- API Design & Development
- Feature Development
- Unit Testing (Jest)
- API Documentation (Swagger / OpenAPI)

Frontend (Supporting Skill)
- React.js
- HTML / CSS / JavaScript

AI-Assisted Development
- Prompt Engineering for Code Generation
- AI-assisted Software Development
- Code Review & Refactoring with AI Tools
- AI-assisted Debugging

Programming Languages
- JavaScript / TypeScript
- Golang
- PHP
- Node.js
- Laravel/Lumen

Version Control
- Git
- GitHub

Databases
- MongoDB (NoSQL)
- MySQL (SQL)
- Database Design & Query Optimization

Professional Skills
- Analytical Thinking & Problem Solving
- Detail Oriented
- Teamwork & Cross-team Collaboration
- Curiosity & Continuous Learning
- Empathy in Team Communication
- Self-Motivation & Ownership

COURSE

Software Engineer Fundamental
RevoU
RevoU HTML, CSS, Javascript, Web Engineer, Software Engineer

CERTIFICATIONS

Software Engineering Fundamental
RevoU 2024. Completed 2 weeks course from RevoU.

Completing Zettacamp Batch #3
Zettabyte Pte. Ltd. 2022. Graduated and completed the final project from the Intensive Bootcamp, Batch #3 at Zettabyte Pte. Ltd.
